EDUCATION

STI College San Jose del Monte, Bulacan, Philippines
Bachelor of Science in Computer Engineering

Aug 2022 – July 2026

EXPERIENCE

PV Venture Corporation
App Development Intern

June 2026 – Aug 2026

- Developed an Android app using Flutter, building app screens and core features for a pet products e-commerce loyalty application, resulting in a working Android app prototype.
- Implemented Firebase Authentication and basic app functions, handling user login and app integration, resulting in a more secure and functional application.
- Worked on the loyalty and rewards system, supporting feature development and testing, resulting in progress on the reward system before the internship ended.

PROJECTS

Hearth — Personal Finance Tracker

- Built a personal finance app using React Native and Expo, creating budgeting, savings goals, and expense tracking features, resulting in an offline-first finance app.
- Organized app data using Zustand, managing budgets, debts, and investments, resulting in a simpler and easier-to-maintain app structure.
- Tested the application with Jest and React Native Testing Library, checking app logic and components, resulting in improved app reliability.

School Supplies Inventory System — Offline POS & Inventory Desktop App

- Developed a desktop POS and inventory app using Electron and React, creating sales and inventory features, resulting in an offline inventory management system.
- Added FEFO inventory tracking and role-based access, managing stock and staff permissions, resulting in better inventory control.
- Built credit tracking and purchase order features, supporting daily shop operations, resulting in a more useful business management tool.

Cheapr — Crowd-Sourced Price Comparison App

- Designed a mobile app using React Native and Expo, creating product search, price comparison, and store browsing screens, resulting in a user-friendly shopping app.
- Built barcode scanning and price comparison features, helping users compare prices across stores, resulting in easier price checking.
- Added shopping lists and price alerts, helping users track products and discounts, resulting in a more useful shopping experience.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Dart, HTML, CSS

Frameworks & Tools: React, React Native, Flutter, Expo, Tailwind CSS, Node.js

Database & Backend: Firebase, Supabase, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Vite, Google Apps Script

CERTIFICATIONS

AWS Academy Graduate — Cloud Foundations (Nov 2025) – Learned cloud computing, AWS services, and basic cloud architecture.
